### **BACKGROUND**

The higher education systems in Vietnam and Asian countries have grown significantly in recent years. However, these systems have shown many issues of concern, research for effective solutions and innovation. The outstanding issues are quality, finance, management; quality evaluation and verification; integration and international cooperation. These issues are very important not only for Vietnam but also for Asian countries. In fact, Vietnam and Asian countries are now focusing on higher education system as a strategy in constructing a knowledge based - information society of the XXI century.

In order to become an effective strategy for the socio-economic development, higher education institutions must perform its role of creating new knowledge, acquiring new technologies and training smart human resources through teaching, research and international cooperation.
